Professional Summary

I am a hardworking individual who is deeply passionate about my career. I am committed to constantly expanding my knowledge and expertise in front-end development. Currently, I am learning new backend skills and honing my React layout skills to create more complex designs. I strive to write clean high-quality code and consistently work towards improving it. I have a strong desire to learn new technologies and am currently exploring React Native to develop iOS and Android applications. I am always excited to acquire new skills and expand my knowledge base.

Technical Skills

- Languages: **JavaScript, JSON, HTML, CSS**
- Libraries: **React, React Router DOM, Node.js, Express.js, Mongoose**
- Frameworks: **MERN Stack, AJAX/HTTP**
- Databases: **MongoDB, Firebase**
- Authorization: **Bcrypt**
- Version Control: **Git**

Projects

Whisppara Test Page

[github](#) | TECHNOLOGIES: **React, React Router DOM, JavaScript, CSS**

- The Whisppara project leverages the ColourLovers API to offer users a selection of digital color choices. The implementation of this project was accomplished through the use of the React framework, resulting in a Single Page Application that was streamlined through the implementation of React Router DOM. The end result is a visually appealing and user-friendly interface.

Meme List Generator

[github](#) | TECHNOLOGIES: **React, JavaScript, CSS,**

- The Meme Generator project showcases my proficiency in utilizing state management in a clear and concise manner. It is a Single Page Application that adeptly performs API calls to extract relevant data. Additionally, the interface provides users with the capability to persist their personalized state, affording them the flexibility to modify and delete the stored data at their discretion.

Experience

Customer Support, Whole Foods 03/2022 - Present

- Acting Store Scan Specialist assisting in the marketing at Whole Foods' activities to drive customer relations.
- Collaborate with colleagues, handle customer requests, and support other team members.
- Adapt to changing situations, multitask, and handle high volumes of customers.

- Learn and memorize product information and be able to provide recommendations and answer customer questions.
- Experience handling cash, including counting money, making change, and balancing your register at the end of your shift.

Education

V School

Salt Lake City,

Utah 2023

This program is an online technical school teaching both the frontend and backend development processes using HTML, CSS, JavaScript, and MERN stack (Mongo, Express, React, Node.js).

Volunteer work

HotZone

TECHNOLOGIES: **React, React Router DOM, Vite, Node, Firebase**

- As a community service initiative for the Lehi Fire Department in Salt Lake City, I am contributing to the development of HotZone. This project utilizes React to create an informative and resourceful application for our first responders. I have been actively involved in crafting several pages and have consistently prioritized accuracy and code reusability to ensure optimal application performance.
